Administration / Lab: Active Directory fundamentals, Windows/Linux virtual lab, endpoint setup, custom PC builds, driver updates, OS installation

CERTIFICATIONS

CompTIA Security+ ce (Active: Feb 13, 2026; Expires: Feb 13, 2029) | CompTIA Network+ ce (Active: Nov 8, 2025; Expires: Feb 13, 2029) | Google IT Support, Coursera (2024) | Google AI Essentials, Coursera (2024)

PROFESSIONAL EXPERIENCE

IT Support Specialist / Security & Account Support | SemSwitch, Inc., Dallas, TX / Remote | Nov 17, 2025 - Present
- Supported day-to-day company IT operations across user accounts, website/app access, email-based customer support, authentication, and basic security workflows.
- Resolved customer account issues by email, including login failures, access questions, and account-scope troubleshooting for website and application users.
- Assisted with access and authentication setup tied to network configuration, permissions scope, and validation of protected account-access paths.
- Identified suspicious website scanning for leaked credentials or exposed access points; added protective guards, tested controls, and used AI-assisted troubleshooting to speed triage/documentation.

IT & POS Systems Support | Uptown Vape Shop, Arlington, TX | Jan 2022 - Oct 2023
- Supported store technology operations across POS systems, Windows devices, printers/peripherals, software, and network connectivity to reduce downtime during customer-facing operations.
- Configured and maintained TCP/IP network settings and Lightspeed POS workflows; diagnosed LAN/Wi-Fi/DHCP issues and coordinated vendor escalation when needed.
- Trained 3 staff members on POS and inventory workflows and created step-by-step guidance to improve onboarding and reduce repeat user errors.
- Documented fixes, configurations, and recurring issues to build a reusable troubleshooting history for store operations and future support.

IT Support Specialist / Operations Technology Support | Independent E-Commerce Operations, Remote / Office-Based | Sep 2017 - Dec 2020
- Supported technology operations for an Amazon/eBay e-commerce business, including workstation setup, office internet connectivity, shipping label printers, inventory tracking, and order-management workflows.
- Maintained Excel-based inventory and order-tracking sheets used to monitor stock levels, sales activity, shipping status, and product movement across online marketplaces.
- Resolved buyer and internal support issues through marketplace messaging and email, including shipping questions, product questions, order updates, and basic technical guidance for electronics.
- Troubleshot printers, network connectivity, endpoint devices, and daily workflow issues used for picking, packing, label printing, and inventory management.

PROJECTS & LAB

- IT Home Lab & Professional Development (2024-Present): Practiced Windows/Linux networking, help desk workflows, Active Directory fundamentals, account administration, and troubleshooting scenarios in a virtual lab.
- Hands-On IT Support & Troubleshooting: Provided practical support for personal contacts, home users, and small-business environments, including Windows 10/11 troubleshooting, printers, Wi-Fi/router issues, Microsoft 365, Google Workspace, email access, and basic security guidance.
- Custom PC Builds: Assembled and configured 3 client PCs, including component selection, Windows 10/11 installation, driver updates, optimization, and handoff instructions.
- Small Network Setup: Designed TCP/IP and DHCP network setups for 10+ connected devices; validated connectivity, device configuration, and basic reliability.

EDUCATION

High School Diploma | Colleyville Heritage High School, Colleyville, TX | 2013
