HUSSAIN ALI

IT SUPPORT TECHNICIAN | DESKTOP SUPPORT | IMAGING & DEPLOYMENT

Aubrey, TX | 682-406-2804 | techhelp.hussainali@gmail.com | github.com/HussainAli-0817

PROFESSIONAL SUMMARY

CompTIA Security+ and Network+ certified IT support professional with hands-on experience supporting Windows 10/11 systems, user accounts and access, hardware/software, printers/POS systems, small-business networks, remote users, and technical documentation. Troubleshoots login, endpoint, LAN/Wi-Fi, and workflow issues and documents resolutions and escalation steps. Practical lab experience with Active Directory, Windows installation and deployment, PowerShell, Jira ticketing, and structured troubleshooting. Microsoft MD-102 exam scheduled October 10, 2026; building Microsoft 365, Entra ID, and Intune skills.

CORE SKILLS

Help Desk, Desktop Support & Ticketing: End-user and customer support, remote/onsite troubleshooting, account and login support, hardware/software issue resolution, Jira Service Management (lab), ticket intake, impact and priority, internal notes, customer updates, escalation, resolution documentation

Systems, Deployment & Applications: Windows 10/11, OS installation and deployment practice, bootable USB/SSD media, disk partitions, BIOS/UEFI, drivers and updates, software installation, hardware upgrades, printer/peripheral support, Microsoft 365 and Outlook/Teams/OneDrive support fundamentals (learning), Google Workspace, Lightspeed POS, Excel inventory tracking

Networking & Administration: TCP/IP, DHCP, DNS, LAN/Wi-Fi troubleshooting, router/access-point setup, ping, ipconfig, tracert, nslookup, Active Directory users/groups/OUs, password resets, account unlocks and permissions (homelab), MFA/access concepts, Entra ID concepts (learning)

Security, Documentation & Operations: User identity verification, least privilege, MFA concepts, suspicious activity recognition, Windows Defender and firewall fundamentals, malware/bloatware removal, SOP adherence, asset tracking, knowledge notes, customer communication, and vendor escalation

Remote Support, Scripting & Tools: AnyDesk, Chrome Remote Desktop, PowerShell, Command Prompt, foundational Bash, VirtualBox, Git, GitHub, asset and inventory tracking

Generative AI & Technical Productivity: ChatGPT, Gemini, Codex, AI agents, structured prompting, troubleshooting research, issue summarization, PowerShell/script review, workflow automation, documentation drafting, and output validation

CERTIFICATIONS & TRAINING

CompTIA Security+ ce - Active through Feb 2029 | CompTIA Network+ ce - Active through Feb 2029 | Microsoft MD-102: Endpoint Administrator - Exam scheduled Oct 10, 2026 | Google IT Support (2024) | Google AI Essentials (2024)

PROFESSIONAL EXPERIENCE

IT Support Specialist / Security & Account Support | SemSwitch, Inc., Dallas, TX / Remote **Nov 2025 - Present**

- Support user accounts, website/app access, authentication issues, email-based requests, and basic security workflows in a remote startup environment.
- Investigate login and access problems, verify account scope and protected access paths, communicate clear resolutions, and escalate issues outside scope.
- Document suspicious website activity, exposed-access risks, tests performed, technical findings, and recommended remediation steps.

IT & POS Systems Support | Uptown Vape Shop, Arlington, TX **Jan 2022 - Oct 2023**

- Supported Windows devices, Lightspeed POS, receipt printers, peripherals, software, and LAN/Wi-Fi connectivity to reduce downtime during customer-facing operations.
- Configured POS workflows and TCP/IP settings, diagnosed LAN/Wi-Fi/DHCP issues, documented recurring fixes, trained three staff members, and coordinated vendor escalation when needed.

IT Support / Operations Technology | Independent E-Commerce Operations, Remote / Office-Based **Sep 2017 - Dec 2020**

- Supported workstations, office internet, shipping-label printers, and Amazon/eBay workflows; maintained Excel inventory and profitability tracking with formulas for costs, shipping, taxes, and margin.
- Troubleshot endpoint, printer, network, and workflow issues used for inventory, picking, packing, shipping, and customer support operations.

PROJECTS & HANDS-ON PRACTICE

Active Directory & Windows Support Lab

- Built a Windows Server/Windows 10 domain environment in VirtualBox; configured a domain, OUs, users, groups, password resets, account unlocks, permissions, and PowerShell validation.
- Created bootable Windows/Linux media, configured disk partitions and BIOS/UEFI settings, installed operating systems, drivers, updates, and applications, and validated endpoint functionality.

Home Network Deployment & IoT Troubleshooting

- Deployed a two-node Wi-Fi 6 mesh supporting approximately 35-40 wired, wireless, and IoT devices; configured AT&T gateway IP passthrough, disabled gateway Wi-Fi, applied QoS and Cloudflare DNS, optimized placement, and resolved weak coverage and intermittent connectivity.

Help Desk Ticketing Practice

- Documented an account-lockout scenario in Jira with issue summary, impact, troubleshooting steps, internal notes, user communication, resolution, validation, and closure notes.

Generative AI & Agent-Based IT Support Workflow

- Configured ChatGPT, Gemini, Codex, and multi-agent workflows to support IT troubleshooting labs, PowerShell tasks, technical research, evidence review, and validation of project results.
- Used specialized agents to research issues, generate and review scripts, organize GitHub repositories, summarize findings, draft escalation-style notes, and improve documentation accuracy and consistency.

EDUCATION

High School Diploma | Colleyville Heritage High School, Colleyville, TX | 2013
